

ScotGems plc

30 September 2018

Investment Objective

The investment objective for ScotGems ("The Company") is to provide long-term capital growth.

The Company seeks to achieve this by investing in a diversified portfolio of small cap companies listed on global stock markets, across a range of sectors. Small cap companies are currently defined as those with a market cap of less than \$2.5bn at the time of purchase, although the Manager may review this definition from time to time. The Manager envisages that the Company's investment portfolio will be tilted, at least initially, towards small cap companies in Asia Pacific and Global Emerging Markets. The ScotGems portfolio is concentrated, typically comprising 20-30 holdings.

Manager Profile

Stewart Investors is a team of investment professionals who manage portfolios on behalf of clients in Asia Pacific, Emerging Markets, Frontier, Latin American, Worldwide, and Sustainable equity strategies. The team consists of members based in Edinburgh, London, Singapore and Sydney.

The Manager's investment philosophy is founded on the principle of responsible stewardship, and a belief that investment ought to have a social purpose, this being the efficient allocation of clients' assets to high quality companies at sensible prices. The Manager has a long term investment approach and has been invested in some companies for over twenty years. This entails responsibilities as well as normal shareholders' rights and involves engaging extensively on environmental, labour and various governance issues. The investment style is inherently conservative, focusing on the downside risks as well as on the upside potential of any investment. Capital preservation is deemed as important to the Manager as capital growth.

Risk Indicator

*Lower risk**Higher risk*

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The Trust has classified itself as a level 3 risk, which is a medium-low risk class. The risk indicator assumes you hold your shares in the Trust for at least 5 years. This rates the potential losses from future performance at a medium level and poor market conditions could impact the amount you get back. Investing includes certain risks including:

- **The value of investments and any income from them may go down as well as up and are not guaranteed. Investors may get back significantly less than the original amount invested.**
- **currency risk:** the Company invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Company.
- **emerging market risk:** emerging markets may not provide the same level of investor protection as a developed market; they may involve a higher risk than investing in developed markets.
- **smaller company investments:** the Company typically invests in smaller company shares which can be more unpredictable and more difficult to sell than those of larger company shares.
- **concentration risk:** the Company invests in a relatively small number of companies which may be riskier than a Company that invests in a large number of companies.
- **price:** The Company's share price may not fully reflect net asset value.

For an overview of the terms of investment, risks and costs and charges please refer to the Prospectus, Investor Disclosure Document and Key Information Document from which the risk indicator is taken.

If you are in any doubt as to the suitability of the Company for your investment needs please seek investment advice.
